

What is an abortion?

An abortion is when you stop your pregnancy before the birth.

This can be done by taking 2 different types of pills...

...or having an operation.

You will need to talk to a professional to tell them how you feel about your pregnancy.

If you decide to have an abortion you will need to have some medical checks.

An abortion must be done before you are 5 months pregnant (24 weeks).

This will be explained to you.

Questions on abortion

Is an abortion safe?

Abortions are safe but ALL medical treatment has some risk.

Can I bring anyone with me?

You can bring someone to support you.

They can be there before and after the treatment.

You may need someone to take you home when you leave the hospital or clinic.

After an abortion

You may feel a lot of emotions at the same time.

It is normal to have bleeding after an abortion.

If the bleeding is very heavy, go to your doctor straight away.

If you feel really unwell after an abortion you should go to your doctor.

Give yourself time to feel better.
