- you have problems with weeing
- you have a red rash on your skin.

How and when do I take carbamazepine?

The label on your carbamazepine packet should tell you when to take your medicine.

The label should tell you how much medicine you should take.

You should follow these instructions carefully.

You should swallow your tablet with water.

Or, measure and swallow your liquid.

Or, you might have tablets that you can chew and swallow.

If you forget to take your medicine, tell someone straight away.

You should ask your pharmacist if you can crush your medicine or if it can be mixed with a drink.

	<p>You should carry on taking your medicine even if you feel better unless your doctor asks you to stop.</p> <p>You should talk to your doctor before you stop taking your medicine.</p>
	<p>What do I need to know about carbamazepine?</p> <p>Drinking alcohol whilst taking carbamazepine could make you feel drowsy.</p> <p>Some medicines do not work well together.</p> <p>You should tell your doctor about any other medicines you are taking.</p>
	<p>Where can I get more information?</p> <p>This leaflet does not tell you everything about carbamazepine.</p> <p>If you want more information about carbamazepine...</p> <ul style="list-style-type: none">• you can ask your pharmacist, doctor or nurse for more information• you can ask your carer to get more information• you can phone NHS Direct on 0845 4647• you can phone a medicine information helpline on 020 3228 2999.

G. Unwin and S. Deb from the University of Birmingham created this leaflet with help from People First (Staffs) and Mencap. The project was funded by the Big Lottery Fund.

It can be downloaded from www.ld-medication.bham.ac.uk.

The information in this leaflet came from...
